

## Benefits

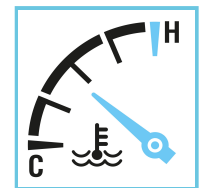

1. dissolves lime and dirt deposits
2. compatible with all sealing materials
3. cleans and protects the cooling system

## Product Description

**BIZOL Radiator Clean+ r70** is a radiator additive Made in Germany developed to clean the entire cooling system. Deposits in the cooling and heating system reduce the heat exchange and can cause an engine damage. This Product contains special, gentle cleaning agents for the entire cooling circuit and does not have a negative effect on the radiator and sealing. It dissolves contaminants containing oil and lime and should be used before changing the coolant. **BIZOL Radiator Clean+ r70** effectively cleans and protects the cooling circuit and is suitable for all cooling systems in motor vehicles, trucks and buses.

Name	Value	Method
Appearance	clear	
Density at 15 °C	1200 kg/m <sup>3</sup>	DIN EN ISO 12 185

## How to use

A 250 ml can is efficient for 9 litres of coolant. Add the content into the cooling water. Start the engine and let the heating system run. Depending on the degree of contamination, let the engine idle for approximately 10 to 30 minutes at operating temperature. Empty the cooling system and flush with water. Fill the cooling system according to the manufacturer's instructions.
